

Since 1998, iCARD Systems has been an innovative pioneer in the development of prepaid Visa® and merchant gift card programs. Our solutions deliver results for corporate gift, incentive, promotion, and rebate programs.

A Fortune 1000 supply chain systems company wanted to simplify commission payments while providing an incentive to its outside sales force. With iRewards commissions are conveniently added onto a re-loadable prepaid card; the co-branded card also raises awareness among its outside sales force.

Incentives

A government agency was looking for a “green” incentive solution. They chose iCARD’s emailable gift card which allows the recipient to choose from dozens of merchants offering eCodes in lieu of plastics.

Promotions

A leading telco was looking for a unique consumer promotion that would be attractive to both its marketing partners and its customers. They chose a co-branded prepaid Visa card from iCARD.

Gifts

Another telco plagued by problematic deliveries and poor customer support, switched fulfillment to iCARD.

A software company needed a way to provide a cash rebate to its customers. iCARD developed a prepaid solution that saved them time and money.

Rebates

A leading wholesale OEM tire distributor replaced its internally-managed rebate program with a solution from iCARD that saves time and money, reduces fulfillment hassles, and provides sophisticated tracking.

The municipality of a popular tourist destination uses a solution from iCARD to encourage travel during the off-peak season.
